

BE SURE YOUR SAFETY PROFESSIONALS ARE INVOLVED IN THE MTA SAFETY COUNCIL

The operation of a good safety compliance program is a duty and obligation of every motor carrier. To be in safety compliance, carriers must stay current on constantly changing DOT regulations. One simple accident can bankrupt a carrier or raise his insurance premiums to a prohibitive level. An unsatisfactory record of compliance with safety regulations can lead to loss of operating authority, civil and criminal penalties and shut down a trucking company's operations.

The Mississippi Trucking Association Safety Management Council is an excellent source of information and assistance on safety matters for MTA members. It can help carriers set up a good safety program. Membership in the council is open to employees of Carrier members and Allied members of MTA in good standing. The council is actively involved in safety through monthly meeting programs, the annual truck driving championships, selecting and honoring drivers of the year, fleet safety awards, safety workshops, complimentary roadside safety inspections etc.

MTA encourages all of its members to have at least one active member in the safety council.
